These two anthological collections appear as sound boxes of Verhaeren's diverse styles during a decisive period of his formation. The reader can hear the poet's multiple voices and find the motifs and the examples of style that are found throughout his work: pictorial transportation, veins of landscape, history, religiosity, or of the erotic; travel poetry, but also that of his native country. The reader will enter as such into the artist's studio, and in a way more striking than the game of varieties proposed by this edition allows, so as to follow the sudden breakthroughs found in each of the pieces since their first appearance in critical publication.
